

SOLVING THE WORLD'S MOST COMPLEX
LITIGATION CHALLENGES

GOLD: CLAIMS MANAGEMENT SYSTEM

Effectively manage data and documents

Nathan has developed a hosted claims management solution for companies managing mass tort litigation which provides clients with the means to effectively and efficiently manage data and documents relating to all aspects of litigation.

The product is user-friendly with a browser-based interface and back-end data storage in SQL, a relational database product developed by Microsoft.

A HIGH-QUALITY, HOSTED CLAIMS MANAGEMENT TOOL FOR DEFENDANT COMPANIES AND THEIR LEGAL COUNSEL

- Easy-to-use, fully customizable, robust, and cost effective.
- Provides centralized location for all required data and documents for the lawsuits, claimants, and claims.
- Ability to bring defendant company, NCC, local counsel, and experts onto one platform to increase efficiency and allow for real-time, accurate reporting.
- Offers automated communications for items such as new claims filed, requests for settlement authority, and other regularly occurring needs.
- Integrated tracking of costs and payments, with functionality to accept LEDES defense cost data from other systems, provides greater certainty to internal constituents and the critical ability to prove costs and policy exhaustion in litigation.
- Allows secure access and editing rights at a user level on all fields.

HOSTED MODEL PROVIDES THE RIGHT BALANCE OF COST, SERVICE AND BENEFITS FOR MOST DEFENDANT COMPANIES

- System is designed, developed, customized and hosted by Nathan with ongoing technical support and other assistance provided on an as-needed basis.
- Ongoing processing, updating, and reporting is efficiently and cost-effectively handled by others, such as in-house personnel or law firm paralegals.
- You control the process and information and build deeper knowledge on the cases that comes from handling the claims.
- Program is highly scalable with consistent, but customized, user interface across multiple defendant companies and/or claim types.

EVERYTHING YOU SEE IS 100% CUSTOMIZABLE

- Start with a fully functional system as the basis for client customization; you are not paying for ground up development.
- You only pay for what you need. You are not paying the development costs for a shared platform to meet other parties' needs.
- It's your database and we set it up to meet your needs. There is no limit (other than screen space) on number of fields, the naming of fields, organization, etc.

EXTREMELY POWERFUL REPORTING AND DATA EXPORT TOOLS

- You have access to all data and do with it what you want, when you want.
- Dashboard provides immediate, at-a-glance review of important statistics.
- All data is easily exported to Excel to manipulate, summarize and report. No more piecing together various pdf reports or paying thousands of dollars for a revised version.
- Ease of export allows for efficiently handling additional tasks, such as preparing allocations to insurance coverage and for insurer billing, and the ability to post results on the site.
- In addition to a variety of report templates on the site, users can create and save all of their own, including an export for Medicare reporting.

COSTS ARE TRANSPARENT AND OVERALL COST SAVINGS CAN OFTEN BE REALIZED THROUGH IMPROVED EFFICIENCY AND PREPAREDNESS

- Initial development and customization is billed on an hourly basis subject to an agreed-upon budget and scope.
- Fixed monthly fee covers ongoing hosting, security, and a certain number of support hours.
- Hourly billing is available to assist with additional needs (insurer billing, litigation/settlement support, etc.).
